Everything OS/2 can do for you...

OS/2 lets you keep two or more programs running at the same time, so you can do more.

OS/2® includes a built-in graphical interface, so it's easy to use.

OS/2 provides an optional Database Manager to make managing information easy.

OS/2 lets you run your DOS programs plus hundreds of programs DOS can't.

OS/2 lets you take full advantage of Micro Channel.™

OS/2 lets you take advantage of 386™ power.

OS/2 lets you run programs larger than 640K, so you can run more powerful applications.

OS/2 provides an optional Communications Manager which allows easy networking.

...this offer lets you do for less.

"I believe OS/2 is destined to be the most important operating system—and possibly program—of all time."
—Bill Gates in the Foreword to the OS/2 Programmer's Guide

It's a great piece of software.

To start with, all editions of OS/2 offer DOS compatibility. So you can both protect your investment in DOS applications, and make the transition to OS/2 a smooth one. We've made it easy. Because in a working environment, "easy" quickly translates to "productive."

Our Presentation Manager windowing cuts down on learning time and simplifies operations. Dialog Manager helps you develop applications with easy-to-use, menu-based features. File Manager eliminates complex commands. A 16Mb addressable RAM support lets you use functionally rich applications that can process large amounts of data. And the Clipboard lets you move text and graphics among those spreadsheets, word processors and databases.

The OS/2 Extended Edition gives you even more. A dynamic data exchange offers an immediate, on-screen updating of information among separate active

Much less.

applications. The Communications Manager gives you the flexibility to receive and send data over a wide range of connections. Plus, our LAN Requester allows you transparent access to LAN resources, including disk space, printers, processing capabilities and serially attached devices.

OS/2 can do so much for you.
And now it's yours with great savings, too.

Right now, when you make the move to OS/2, you can get from $100 to $1600 back on the kind of memory only OS/2 can handle—plus thousands of dollars in rebates on over 100 different OS/2 programs. What's more, you can also get hundreds of dollars back on modems, accessory cards and hardware—all the things that help you do more work in less time with OS/2.

The chart below gives a general overview of the exceptional rebates IBM has in store for you when you choose OS/2 between May 9, 1989 and December 31, 1989.

OS/2 Rebate Overview

Choose one of these versions of OS/2...

	OS/2 Standard Edition	OS/2 Extended Edition	OS/2 Extended Edition with OS/2 LAN Server
	...and be eligible for these rebates:		
Memory	**$100/Mb** $100 minimum $400 maximum	**$200/Mb** $200 minimum $800 maximum	**$200/Mb** $200 minimum $1600 maximum
60 Mb Fixed Disk Upgrade Option	**$250**	**$250**	**$250**
Communication/ Modem Adapters	Not applicable	**$50/adapter**	**$50/adapter**
Software	**ONE rebate** per product per OS/2 license	**ONE rebate** per product per OS/2 license	**ONE rebate** per product per OS/2 license
